

# DIGITAL

**PRINTABLE MEDIA** : The printable media process consists of printing and cutting a photo or logo on iron-on paper. Once the support is made, it is hot pressed onto the textile. This technique allows you to reproduce a quality image or photo (150 dpi and +) to perfection.

**3M REFLECTIVE & THERMOFILM** : Thermo film is a technique which corresponds to a rigorous cutting in plain colored vinyl which will then be transferred hot onto the textile using a professional press. This process is practical for lettering, personalization and decoration using 3M reflective material.

**Production time :**

10 to 15 working days after order and visual proof approval.

(Production time may vary depending on the time of the year)

## PRINTABLE MEDIA
